#### Forward looking statements

The materials in this presentation speak only as of the date of these materials, and include forward looking statements about CSL Limited and its related bodies corporate (CSL) financial results and estimates, business prospects and products in research, all of which involve substantial risks and uncertainties, many of which are outside the control of, and are unknown to, CSL. You can identify these forward looking statements by the fact that they use words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "target," "may," "assume," and other words and terms of similar meaning in connection with any discussion of future operating or financial performance. Factors that could cause actual results to differ materially include: the success of research and development activities, decisions by regulatory authorities regarding approval of our products as well as their decisions regarding label claims; competitive developments affecting our products; the ability to successfully market new and existing products; difficulties or delays in manufacturing; trade buying patterns and fluctuations in interest and currency exchange rates; legislation or regulations that affect product production, distribution, pricing, reimbursement or access; litigation or government investigations, and CSL's ability to protect its patents and other intellectual property. The statements being made in this presentation do not constitute an offer to sell, or solicitation of an offer to buy, any securities of CSL.

No representation, warranty or assurance (express or implied) is given or made in relation to any forward looking statement by any person (including CSL). In particular, no representation, warranty or assurance (express or implied) is given in relation to any underlying assumption or that any forward looking statement will be achieved. Actual future events may vary materially from the forward looking statements and the assumptions on which the forward looking statements are based.

Subject to any continuing obligations under applicable law or any relevant listing rules of the Australian Securities Exchange, CSL disclaims any obligation or undertaking to disseminate any updates or revisions to any forward looking statements in these materials to reflect any change in expectations in relation to any forward looking statements or any change in events, conditions or circumstances on which any such statement is based. Nothing in these materials shall under any circumstances create an implication that there has been no change in the affairs of CSL since the date of these materials.

### **Notes**

Constant currency removes the impact of exchange rate movements to facilitate comparability by restating the current year's results at the prior year's rates. This is done in two parts: a) by converting the current year net profit of entities in the group that have reporting currencies other than US Dollars at the rates that were applicable to the prior year ("translation currency effect") and comparing this with the actual profit of those entities for the current year; and b) by restating material transactions booked by the group that are impacted by exchange rate movements at the rate that would have applied to the transaction if it had occurred in the prior year ("transaction currency effect") and comparing this with the actual transaction recorded in the current year. The sum of translation currency effect and transaction currency effect is the amount by which reported net profit is adjusted to calculate the result at constant currency.

#### Summary NPAT

| Reported Net Profit after Tax            | US\$ | 626.9m  |
|--|------|---------|
| Translation Currency Effect (1)          | US\$ | 60.5m   |
| Transaction Currency Effect (2)          | US\$ | (55.6)m |
| Constant Currency Net Profit after Tax * | US\$ | 631.8m  |

#### a) Translation Currency Effect US\$60.5m

Average Exchange rates used for calculation in major currencies were as follows:

| Six month | ns ended |
|-----------|----------|
| Dec 11    | Dec 12   |
| 0.85      | 0.95     |
| 0.71      | 0.79     |

#### b) Transaction Currency Effect US\$(55.6m)

Transaction currency effect is calculated by reference to the applicable prior year exchange rates. The calculation takes into account the timing of sales both internally within the CSL Group (ie from a manufacturer to a distributor) and externally (ie to the final customer) and the relevant exchange rates applicable to each transaction.

#### Summary Sales

USD/CHF USD/EUR

| Reported Sales            | \$2,482.3m |
|---------------------------|------------|
| Currency Effect (c)       | \$85.3m    |
| Constant Currency Sales * | \$2,567.6m |

#### c) Constant Currency Effect \$85.3m

Constant currency effect is presented as a single amount due to the complex and interrelated nature of currency impact on sales.

<sup>\*</sup> Constant currency net profit after tax and sales has not been audited or reviewed in accordance with Australian Auditing Standards
